

Vembu SaaSBackup for Google Apps(Now G Suite)

G Suite is Google's own brand of cloud computing, productivity and collaboration tools, software and products. When it comes to documentation, collaborative tools have become prominent and widely used by organizations. Although data is stored in the cloud for easy accessibility and security, we cannot rule out the increased risk to data through malware attacks, human error and other reasons. Hence Cloud-cloud Backup or SaaSBackup is gaining prominence among IT administrators. Vembu SaaSBackup offers Backup & Recovery of emails, drives, contacts and calendars of Google Apps(Now, G Suite) through its reliable and effective mechanism.

Backup solution for Google Apps(Now, G Suite)

Google Apps(now, G Suite) is one of the leading cloud-based applications with more than 60% of Fortune 500 businesses using the application. Businesses have started moving to these cloud-based applications for multiple reasons including economic and technological.
