

Vembu Backup for Microsoft Office 365

Microsoft Office 365 is a reliable Software as a Service (SaaS) platform that ensures high availability, but the possibilities of data loss due to limited build-in data protection against deletion, overwriting, ransomware, human error, and other data threats always exist. Vembu Backup for Microsoft Office 365 protects the entire Microsoft Office 365 domain, which includes an inbox, sent items, and other custom labels from Email, files from OneDrive like photos, pdf, text documents, spreadsheets, presentations, forms, etc, contact information and calendar events from your Microsoft Office 365 account, to the local data center.

Customer Quotes

"Vembu is a great product that has never let us down even in the most critical of times. As all IT providers know it is imperative you have a backup solution that you and your customers can rely on safe in the knowledge if the worst happened our data is safe. We look forward to continuing our partnership with Vembu."

-Adam Hicks, Go2 IT Solutions

"We were looking for a product that would centralize multiple products and be a turnkey solution. Vembu allowed us the ability to support multiple customers with different environments using an enterprise grade product at an affordable cost"

- Eyal, CTO, Double Down Tech
