

Cloud Replication using Vembu CloudDR

Vembu CloudDR offers added data protection by allowing you to transfer data to Vembu Cloud. With this option, you can now directly replicate the backed up data from local BDR server to our Vembu cloud. In a case of BDR server crash or any disaster, the backed up data can be restored from Vembu cloud without any complication. There are multiple restore options available, including booting a live VM on our cloud, anytime anywhere restore via the internet and the restored data can be downloaded to USB drive and shipped.

“ Vembu ensures availability of our core productions systems that support Mackie’s business operations. 24x7 availability of business applications and its data is critical for us, and Vembu delivers on these requirements. Vembu has become an integral component of our IT and business continuity strategy.”

Lee Wong, Manager of Information Technology at The Mackie Group

Vembu have been a valued partner since starting to use the product around 5 years ago. We’ve consistently seen improvements and upgrades as needed. When we’ve had problems they’ve been there to help, no hard sales and no fuss.

Alan Morris, Head of Technical Services, Cyngor Sir CEREDIGION County Council

Vembu CloudDR features

Live Data Transfer: Instantly transfer data from local backup server to the Vembu cloud. Live DATA transfer enables seamless data transfer between backup servers to Vembu CloudDR so that the server stays updated instantaneously

Instant Disaster Recovery: With the help of backup server data stored in the Vembu Cloud, the backup server can be rebuilt effortlessly in case of any disaster, hardware failure, etc

Ultra Fast Recovery: The replicated data stored on Vembu Cloud can be downloaded anywhere from the world at any time by just logging into the Vembu OnlineBackup portal

Geographically Redundant: Vembu CloudDR is available for Americas, EMEA and APAC regions wherein the user can store their backup server data in the local region or can store the data in any other storage region as per their wish

Pay as You Go: Vembu CloudDR comes with a 10 GB of free storage. Pricing of Vembu CloudDR is affordable- just \$0.20/GB/Month and it will be billed as per the usage only

Armoured Data Protection: The data is encrypted with AES-256 encryption algorithm while transferring the data to Vembu Cloud and while storing also, the data will be kept encrypted to protect against the online threats and hackers

Leveraged File System: VembuHIVE is an efficient cloud file system designed for large-scale backup and disaster recovery application with support for advanced use-cases. VembuHIVE can be conceived of as a File System of File Systems with in-built version control, encryption and error correction. Vembu is the only backup vendor who uses its own file system to leverage the backed up data

Vembu portal: All the replicated backup data in the CloudDR can managed easily by using the user-friendly Vembu web portal
